

Non-Clinical Placement

Definition of a non-clinical student: A non-clinical student is someone completing a placement that does not involve handling or seeing patient health information (PHI). It does not involve interacting with patients in any way. It is mostly administrative and project based work.

- Must be 18 years old
- May not view or be exposed to Patient Health Information (PHI) in anyway.
- Must not be completing practicum work within clinical areas at any time.

There must be a preceptor in place before you apply for placement within Bon Secours. The Office of Academic Affairs does **NOT** find placement for students.

If you meet the above requirements and need to complete the non-clinical placement paperwork, please contact the Office of Academic Affairs at: BSV-AcademicAffairs@bshsi.org
